

Sinclair Broadcasting's is broadcasting an anti-Kerry documentary right before the election. That is partisan and illegal as I understand the law.

They use public airwaves and must obey the law and serve the public interest.

Their actions show that we need stop the big corporate control mover the media content. The FCC should remove their licensing for such an obvious breach of the public trust!

Unless they also show a pro Kerry program of the same length they are guilty of a major violation of the law and should get more than a slap on the wrist.

The FCC needs to take this breach seriously, very seriously and start suspending licencees who flagrantly and in their nown self interest violate the FCC regulations and interfere in the democratic process like this!

Sincerely,

John MacEnulty
